ssg.vjas.in	13 new · 12 updated · 25 total	Vishwa Alpesh Shah

This document follows the first Review and Update (SSG-RU-2026-001, 9 October 2026). It lists every new addition and update to the Shraman Seva Group app since then, based on the team's feedback between 9 and 15 October 2026, and closes with the points for our next discussion.

Release timeline

SSG-RU-2026-001 — **9 Oct 2026** · Requirements from the Google Meet of 8 Oct: Vihar photo, Sevak Vihar preferences, Upcoming Vihar details, Routes — 4 New Additions

SSG-RU-2026-002 — **15 Oct 2026** · Mumukshu and Internal / Highway Vihars, reports, Dashboard and design refresh, fixes — 9 New Additions, 12 Updated

A New Additions in this release 9

#	AREA	WHAT IS NEW	STATUS
A1	Vihar entry	**Mumukshu count** "Vihar Of" now has Sadhu, Sadhvi and Mumukshu, each with its own count. An entry with only Mumukshu is accepted.	Completed
A2	Vihar entry	**Mukhya Sadhu Bhagwant / Sadhviji Bhagwant** A new field below Samuday. Shown to the Captain in Pending Approvals.	Completed
A3	Vihar entry	**Vihar Type: Internal / Highway** A toggle on the first step of the entry form, for both the Captain's entry and a Sevak's submission. Defaults to Internal.	Completed
A4	Upcoming Vihar	**Internal / Highway when announcing** The same toggle in Announce Upcoming Vihar. The alert to Sevaks reads, for example, "Upcoming Highway Vihar on …", and the card and WhatsApp share show it too.	Completed
A5	Dashboard	**Internal / Highway tile** Shows the Internal and Highway Vihar counts side by side for the selected Vihar Year. For a Captain it covers the whole group.	Completed
A6	PDF & Excel export	**New columns and summary** Mumukshu, Mukhya Bhagwant and Vihar Type columns (each can be ticked or unticked). The TOTAL row adds up Mumukshu and the Internal / Highway split; the PDF summary gains Mumukshu and Internal / Highway boxes.	Completed

#	AREA	WHAT IS NEW	STATUS
A7	Dashboard	**Share badge with WhatsApp and Instagram** The share button now shows both logos and a rotating word (Share, Inspire, Impact, Motivate) with a light animation, to encourage sharing Seva achievements.	Completed
A8	Statistics	**Last 7 days chart and monthly Consistency calendar** A month-by-month calendar coloured by Vihars per day, with tap-to-see details. Leaderboards now sit above the charts.	Completed
A9	Sevak submission	**"Before you submit" guidance** A short note on the first step reminding the Sevak to select every Sevak who was on the Vihar.	Completed

U Updated in this release 12

#	AREA	WHAT CHANGED	STATUS
U1	Vihar entry	**Save error resolved** An entry could fail to save with a technical error when a Captain account was among the selected Sevaks. Entries now save normally in every case.	Completed
U2	Vihar entry	**Captain accounts hidden from Sevak selection** Only Sevaks appear when assigning Sevaks to a Vihar, for both the Captain's entry and a Sevak's submission.	Completed
U3	Sevak profile	**"External" renamed to "Highway"** Vihar Type in the profile is now Internal, Highway or Both. Existing choices were carried over.	Completed
U4	Vihar entry	**Morning / Evening renamed "Vihar Session"** So it is not confused with the new Vihar Type (Internal / Highway). In exports this column is now "Session".	Completed
U5	Whole app	**App-styled selection screens** The phone's plain pickers are replaced with sheets in the app's colours: From / To locations, Vihar Type, Blood Group, Occupation and others. Long lists such as locations have a search box.	Completed
U6	Whole app	**Clearer selected options** The selected option in toggles (Session, Vihar Type, Yes / No) is now solid saffron, so the choice is obvious at a glance.	Completed
U7	Navigation	**New bottom navigation bar** A lighter, rounded bar with larger icons, a matching More menu, and the language menu moved into the header. Swipe left or right to move between pages.	Completed
U8	Dashboard	**Tighter, cleaner layout** Even spacing between stat tiles, "Your Stats", Share and Vihar Year on one line, and Active Sevaks as a single tap-to-open button.	Completed
U9	Dashboard	**My Sankalp card redesigned** A compact white card with a saffron progress ring showing, for example, "2/10", a count-up animation and a soft pulse. Add Vihar stays the one orange action.	Completed

#	AREA	WHAT CHANGED	STATUS
U10	View Entries	**Vihar card image alignment** The saved and shared image of a Vihar card now matches the card on screen, with every value in its correct place.	Completed
U11	Registration	**Captain registration form** Fields reordered with SSG examples, the pincode fills in the city, district and state, and District is recorded.	Completed
U12	Web app	**Repeated page reload resolved** ssg.vjas.in could reload itself repeatedly on some phones. Fixed.	Completed

? For our next discussion

1. **Google Play Store listing.** The Android app is ready; the store listing is still pending, carried over from SSG-RU-2026-001.
2. **Further requirements.** Any new feedback from the Captains and Sevaks for the next release (SSG-RU-2026-003).
